BB SEGURIDADE REPORTS NET INCOME OF BRL 6.8 BILLION IN 9M26

Results remained stable compared to the same period in 2025

BB Seguridade announces recurring managerial net income of BRL 6.8 billion for the first nine months of 2026, remaining virtually stable compared to the same period of 2025.

The combined financial result of BB Seguridade and its investees totaled BRL 1.6 billion, net of taxes, representing year-to-date growth of 4.4%. This performance was driven by higher returns on financial assets, which offset the reduction in average balances.

The non-interest operating result, net of taxes, reached R$5.2 billion, highlighting the pension plans operation, with higher management fee revenues and improved cost-to-income ratio, as well as a strong recovery in net inflows, which contributed to a 12.1% increase in assets under management, surpassing BRL 514 billion.

Delano Valentim, Chief Executive Officer of BB Seguridade, stated: *"The results achieved during this period demonstrate the resilience of our businesses. The combination of operational excellence, financial discipline, and close customer relationships reinforces our ability to deliver consistent and sustainable results over the long term."*

Highlights of the Group's Operations

PENSION PLANS: Pension plans operation reported managerial net income of BRL 1.6 billion in 9M26, an increase of 7.1% compared to the same period of 2025. Performance was driven by a 9.4% increase in non-interest operating result, supported by a 6.5% growth in management fee revenues and a 2.5-percentage-point improvement in the cost-to-income ratio. Net inflows reached BRL 4.5 billion, compared to net outflows of BRL 9.1 billion in the same period of the previous year, reflecting a 6.1% increase in contributions and lower redemption and portability rates, which reached their lowest levels in the last five years.

PREMIUM BONDS: The premium bonds business recorded net income of BRL 269.9 million year-to-date, up 23.2% compared to the same period of the previous year, supported by interest margin expansion and higher average balance of financial assets. According to the latest data released by SUSEP, as of August, Brasilcap maintained its leadership position in the market, accounting for 22.0% of the industry's total collections and holding a 25.9% share of total reserves.

INSURANCE: In the cumulative period through September 2026, the insurance business recorded a 4.2% decline in recurring managerial net income. Performance was impacted by an 8.8% decrease in financial results and lower retained earned premiums, partially offset by a 0.5 percentage point reduction in the loss ratio, which remains at the lowest level in the historical series. Written premiums declined by 9.2%, mainly reflecting lower volumes in crop, rural lien, credit life, and credit life for farmer insurances. On the other hand, home insurance delivered strong growth of 25.0%.

BROKERAGE: BB Corretora reported net income of BRL 2.6 billion in 9M26, representing a 2.2% decrease compared to the same period of 2025.

By combining a customer-centric strategy with operational excellence, capital management efficiency, product innovation, and the continuous strengthening of its distribution channels, BB Seguridade reaffirms its leadership position in the insurance, pension plans, premium bonds, and distribution of protection and financial planning solutions, serving millions of Brazilians.
